Open Analytics

Job Opening Data Scientist

Profile

Open Analytics is an international company based in Antwerp (Belgium) providing data analysis services and products across geographies and industrial sectors. We are looking to expand our team of data scientists with a candidate who fits the following profile:

- MSc / PhD in Computer Science, Engineering or Statistics interested to work on data science problems

- team player and good communicator with fluency in English, verbal and written

- strong experience in data science, statistics, or machine learning

- sound knowledge of a language for scientific computing (R, Python, Julia, C...) and experience with a general-purpose programming language (Java, Python, c++...)

Description

The successful candidate will

- interact with scientists from Open Analytics customers in order to devise and implement analysis platforms and pipelines

- perform data analyses on customer datasets to extract and present insights

- provide input to Open Analytics colleagues that develop the broader hardware and software infrastructure for data analysis applications.

Offer

We offer

- a pleasant and challenging environment in which each person can develop their talents

- opportunities to work on exciting problems at the edge of current knowledge and at the forefront of data analysis technologies

- competitive remuneration package and benefits in line with skills and experience

Applications and inquiries regarding the position can be sent to careers@openanalytics.eu until **July 31, 2017**.
