

## **Biostatistician – Belgium**

***Permanent - Full time***

***Excellent salary + Benefits***

A growing company with an innovative pipeline is currently expanding its team and looking for an experienced Biostatistician to join the team and bring the biometrics team to another level.

Thanks to your solid experience in biostatistics, you will lead projects and oversee all statistical activities related to clinical studies.

This company will offer you the opportunity to work autonomously and be in charge of projects but also to bring your expertise and contribution to the development and the expansion of the biometrics department.

### **Your responsibilities will include:**

- Lead, plan and execute all statistical activities on projects
- Be responsible for the writing all statistical parts of projects from protocols to statistical reports
- Oversee and coordinate all statistical activities outsourced
- Interact with external regulatory agencies and be the company`s representative in relation to statistical topics
- Lead and review all statistical programming activities
- Manage statistical publications and provide statistical support to non-statisticians
- Act as the internal point of contact for biometrics related activities

### **You will have the following profile:**

- Msc or PhD in Statistics, Biostatistics or equivalent
- Solid experience as a Biostatistician developed in a pharmaceutical, CRO or Biotech environment
- Experience developed in statistics applied to clinical trials
- Solid Knowledge of SAS software
- Experience as a Lead on project
- Strong communication and influencing skills
- Fluent in English
