Category: Professor - Established /Leading researcher (R3/R4) (Associado or Catedrático Convidado in the Portuguese system)
Reference: iSTARS/ERA-CHAIR/FMUL

Scientific Area

Data Science, Medical Statistics, Health Informatics, Artificial Intelligence in Medicine, Biostatistics

Details

The Faculty of Medicine of University of Lisbon is seeking a highly motivated leading researcher (R3-R4 level) with excellent scientific credentials in the general scientific area of the project, who is willing to help build a robust and leading group in data science for health research. The successful candidate is expected to shape this new research direction in interaction with other researchers of the School of Medicine, participate in defining new teaching needs in the areas of the project, and lead an interdisciplinary team in research and acquisition of new funding.

This vacancy is for a "fixed term public service contract" expected to be at least 5 years. It is envisaged that at the end of the project, a successful scientist may have the potential for a permanent position at the Faculty of Medicine.
